The Staff

The practice manager, Mrs Kathryn Green and her assistant Mrs Marie Heaps, are responsible for the administration of the practice. Any comments, suggestions and feedback, both negative and positive, are welcome, and should be directed to them.

The Practice Nursing Team

A team of practice nurses and health care assistants work in the treatment room and perform a wide variety of tasks during surgery hours.

The practice nurses are able to offer care in diabetes, asthma and COPD, hypertension, coronary heart disease, cervical smears, sexual health and family planning, travel vaccinations, infant immunisations and minor illness.

Treatment room appointments can be made for all types of dressings and suture removal and various other nursing procedures.

The health care assistants are able to take blood samples, perform ECGs and blood pressure readings.

They are also trained to perform new patient medicals, NHS Health Checks, Vitamin B12 injections and Flu vaccinations

Travel Health and Vaccinations

Please book your travel clinic appointment with the practice nurse well in advance of your holiday, at least six weeks prior to departure. You will be asked to complete a form with the details of your holiday to be returned at least two weeks before your appointment. Please note some vaccinations require more than one visit for a complete course.

There may be a charge for some vaccinations.

St. Mary's Surgery is an approved Yellow Fever Centre.

The Reception Staff

As in every doctor's surgery, the receptionists perform a difficult task, coping with the needs of the patients and the constraints of an appointment system. They are fully trained and will always endeavour to provide the best service possible to the patients in total confidence. It would be very helpful if general enquiries by telephone could be made after 10.30am.

The Dispensary Staff

The team of dispensary assistants dispense prescriptions for patients living more than one mile from the nearest chemist, and also process repeat prescriptions for patients living within the City of Ely.

The Secretarial and Administration Staff

A group of secretaries and administrators completes the practice team, dealing with computer tasks, hospital referrals, pathology results, filing and general administration.

General Practice Training

St. Mary's Surgery is a recognised teaching practice for undergraduates. These students sit in on consultations with the doctors. Patients are informed when students are observing consultations and are perfectly entitled to request the student to leave.

District Nurses

Community nurses based at the Princess of Wales Hospital, Ely are attached to St. Mary's Surgery. They can be contacted on 0844 931 0045, option 1, then option 3.

Health Visitors

The health visitors attached to St. Mary's Surgery are also based at the Princess of Wales Hospital, Ely. They too can be contacted directly by telephoning **Ely 652070**. They are qualified nurses who have undertaken further training in order to work as a member of the primary healthcare team in promoting health and the prevention of illness in children. They work closely with GPs and other social and healthcare professionals and are a great source of support, able to offer telephone advice, information (e.g. to new parents) and screening.

Community Midwives

Community midwives can be contacted at Ely Children's Centre on **Ely 611594**.

Surgery Times

The surgery is open at the following times:

Monday - Friday 8.30am - 6.30pm

Options on the telephone menu are:

1. Make an appointment
2. Genuine medical emergency
3. Cancel an appointment
4. Speak to Dispensary
5. Home visit

Evening GP and some Nurse and Health Care Assistant appointments are available on a Monday and Wednesday up until 7.30pm (Please note other surgery services are not available during these extended hours). Appointments can be made by telephoning **Ely 663434 and pressing option 1** between 8.30am and 1.00pm, and 2.00pm and 6.00pm or by visiting the surgery reception desk between 8.20am and 6.30pm. Appointments are also available to book online; please call at Reception to ask about the registration procedure for online appointments. The same procedure also enables patients to request repeat medication online.

To Register with a GP

Patients wishing to register with a GP and who live within our practice area (shown at the back of this booklet) will be asked to complete a registration form and a new patient questionnaire for each family member with details of full name, date of birth, new address, previous home address and GP details. Your NHS number should be included. On registration you will be given a named accountable GP; you are welcome to express a preference in relation to the GP from whom you wish to receive medical services, and we will endeavour to comply with any reasonable preference. We operate an open access policy whereby any patient can request to see any doctor. However, where possible, it is preferred that a patient sees the same doctor to

encourage continuity of care. If for any reason one doctor is absent, the remaining doctors will see his or her patients where possible.

[Appointments](#)

All consultations with doctors, practice nurses and healthcare assistants between Monday and Friday are by appointment only and are available from 8.30am - 6.00pm. In addition, evening GP appointments beyond 6.30pm are available on a Monday and Wednesday. (Please note not all surgery services are available during these extended hours.) Appointments can be made by telephoning **Ely 663434 and pressing option 1** between 8.30am - 1.00pm and 2.00 - 6.00pm or by personal application at the appointments desk between 8.20am - 6.30pm. As many consultations are clinic-based, it would be helpful if patients could give an indication of their appointment needs to the receptionist. Appointments are categorised either routine or urgent:

[Routine Appointments](#)

These can be booked up to four weeks in advance and are usually for non-urgent problems.

[Urgent Appointments](#)

We operate a triage system for urgent appointments needs, with the aim of assessing the patient's condition by telephone initially and then signposting to the most appropriate treatment or course of action. Access to the triage system is by contacting the surgery on the usual appointments number (01353 663434, option 1) from 8.00am.

Unfortunately, many appointments are lost every week when patients fail to turn up. It would considerably ease the difficulty if cancellations were phoned in to option 3 on the telephone menu at the earliest opportunity so that the appointment can be used by someone else. At times, individual consultations over-run the allocated time, causing delays in subsequent appointments; patients are requested to be understanding of this problem. Appointments can also be cancelled online.

[Out-of-Hours Emergency Service](#)

When this surgery is closed, and in a **genuine medical emergency only**, patients should telephone

NHS **111**, which can be accessed by dialling 111. All called to this service will be assessed and either:

- Medical advice given
- Referral made to a healthcare professional for further advice
- Arrangements made for you to be seen by a healthcare professional at a local centre (Princess of Wales Hospital, ELY, North Cambridgeshire Hospital, WISBECH or Doddington Hospital)
- Arrangements made for you to be visited at home if you are bedbound by your illness or genuinely housebound
- A 999 ambulance despatched if appropriate

The Cambridgeshire and Peterborough Clinical Commissioning Group is responsible for commissioning these services.

[Minor Injuries \(those that have occurred within the last 48 hours\)](#)

Patients should attend the Minor Treatment Centre based at the Princess of Wales Hospital or, out of hours, the accident and emergency departments in Cambridge or Huntingdon. If not urgent, patients may wish to consider contacting NHS 111 (accessed by dialling 111) for advice before attending A&E. We are now also contracted to treat some minor injuries at our surgery at a pre-booked nurse appointment.

[The Minor Injuries Treatment Centre - Princess of Wales Hospital](#)

This is a service where nurse practitioners see patients. They are supported by the doctors from the Cathedral Medical Centre. No appointment is necessary. Examples of what can be treated are:

Wounds - cuts and bruises (risk of tetanus)

Bites – human, insect and animal

Minor burns and scalds

Muscle and joint injuries, strains, sprains and limb fractures

Minor sport injuries

Also, some minor illnesses can be dealt with:

Eye problems - removal of foreign bodies, conjunctivitis

Earache (patients aged two years and over)

Sore throats (patients aged two years and over)

An emergency contraception service is also available.

The unit is open:

Seven days a week 8.30am - 6.00pm (including Bank Holidays). There are no X-ray facilities on a Sunday.

Telephone Number: **01353 656675**

[NHS 111](#)

For information on any aspect of healthcare or advice from qualified nurses, this service may be used as an alternative to contacting the surgery. NHS 111 is manned 24 hours a day including bank holidays. The service can be accessed by telephoning 111.

[Home Visits](#)

If a home visit is required by a patient who is too unwell to travel to the surgery, please telephone **Ely 663434 and press option 5** before 10.00am. All requests for home visits will be triaged so please remember to leave a contact telephone number. The most appropriate person to visit you will be arranged; this may be a paramedic, a member of the JET team, a district nurse or a doctor. A home visit takes four times as long as a surgery consultation. Please attend the surgery wherever possible.

[Sick Certificates](#)

The patient is responsible for self-certification for the first seven days of an illness, using form SC2 which can be obtained from your employer or surgery reception. Thereafter, if appropriate, NHS certificates will be issued by the doctor. A consultation may not always be necessary for a certificate to be issued - please ask at reception

prior to booking an appointment. Please give reception as much information as possible, e.g. date for the start and end of certification required, reason for being unfit for work, any forthcoming hospital appointments.

Dispensing

Under strict NHS regulations, the surgery can only dispense medication for those patients living in the surrounding villages.

Patients living within the City of Ely may collect medication from the local chemists. These are listed at the top of the repeat request slip.

Repeat Prescriptions

Please order your repeat prescriptions in writing, allowing 72 hours for processing. If the computer slip has been mislaid then please write your names and address with a list of the drugs that you require and hand to the dispensary staff.

Repeat requests for medication can be ordered by any of the following;

- Registering with the dispensary to order medication online via the surgery website.
- Faxing directly to the dispensary – 01353 645656
- Post the repeat request slip into the letter box, either in the surgery next to the dispensary or the outside front door letterbox.
- Posting via royal mail.

All the local chemists have repeat boxes within their stores where repeat slips can be posted; the chemists will then deliver these requests to the surgery so that a prescription can be processed and returned to the chemist for them to dispense for you.

Cost Cutters, Little Downham and Stretham Stores have repeat request posting boxes inside the shops. These boxes are emptied twice a week. Dispensing patients can register with the dispensary and we are also able to deliver your medication to these shops for collection at your convenience. We also do home deliveries to patients in Witchford.

Repeat prescriptions are checked by your doctor before being issued. On certain occasions the doctor may decide it is more appropriate to see you for an appointment rather than issuing further medications. This decision is made by the doctor and not the dispensary staff.

In line with national guidelines we have moved to issuing 28 days supply of medicines at a time. There is a huge cost to the NHS of medicines issued to patients that are never used. In certain cases it may be more cost-effective for patients to have a pre-payment certificate.

Like all practices in the locality we comply with the NHS Cambridgeshire prescribing formulary which has a first and second line choice of clinically appropriate drug therapies. There is also a red list of drugs which are not normally funded for prescribing by general practitioners and these can only be prescribed in specific circumstances. From time to time medications may be changed to comply with the Cambridgeshire Joint Prescribing Group policy.

A further way of making sure that the NHS has value for money from the medication that patients take, is by avoiding brands and prescribing by the chemical name (generic prescribing). Brands vary enormously in price whilst the drug is exactly the

same. We are trying to ensure we increase our generic prescribing. We are promoting “self care awareness” and will recommend self purchase of medicines available over the counter where appropriate, e.g. antihistamines, simple analgesics, emollients. The dispensary number is **ELY 663434 and option 4**.

Telephone Calls

If a patient needs to speak to a nurse or doctor, they should telephone **Ely 663434** and speak to the operator, leaving their name, address, telephone number and, if possible, the reason for the call. They will return the call as soon as they are able; please be aware that not all GPs work every day. We aim to return the call within five working days. If urgent it will be passed to the triage team. Please be aware that our number will appear as a ‘withheld’ number for confidentiality reasons. Please advise reception of any change in your contact details (home and mobile numbers and address).

Text Messaging

We have a text messaging service for mobile phones. This allows us to communicate more efficiently with you regarding appointments, health checks, prescriptions, referrals and other aspects of patient care. Please advise reception if you would like to take advantage of this service.

Hospital Transport

To qualify for hospital transport you must live at least three miles from the hospital and have no other means of attending, i.e. own vehicle, friend or public / voluntary transport. If you suffer severe physical or mental problems, or are attending for treatment which has physical side effects, you may qualify for transport. If you think you qualify for transport, this can be arranged by telephoning **0845 603 8117**. Lines are open Monday to Sunday 8am-6.30pm. All subsequent transport arrangements should be made at the hospital when booking your next appointment.

Volunteer Car Service

For patients who do not qualify for hospital transport there is a social car service in Ely operated by Ely & District Volunteer Bureau. For information telephone Ely **666553**. There is a small fee for this service.

Change of Personal Details

We ask our patients to ensure that reception are advised of any change of name, status, address or telephone number, in order for medical records to be accurately maintained. It would also be helpful if you could let us know if you are happy to receive text reminders of your appointments at the surgery.

Disabled Access

Spaces are reserved for the disabled in the rear car park. Wheelchair access is available by the main entrance to the building. A toilet for the disabled is situated on the ground floor. The surgery also has a hearing loop at reception, as well as a portable facility for use within consultations. Please ask at reception if this is required.

Behaviour

Patients using threatening or violent behaviour to GPs or any other person on the practice premises will be removed from the patient list with immediate effect.

Newly Registered Patients

All new patients are warmly welcomed to the practice. On registration each patient will be offered an appointment within six months to see a nursing assistant for a health check. However if you are on medication you will be offered an appointment with our nurse prescriber.

Patients Aged 16-75 Years

Patients aged between 16 and 75 years of age who have not had a consultation in the previous three years can request a consultation for a routine check-up. We invite eligible patients aged 40-74 for an NHS health check every five years.

Patients Aged 75 Years And Over

Patients in this category who have not had a consultation in the previous 12 months are entitled annually to see their doctor or a practice nurse to assess whether any treatment is required. Appointments can be requested at the surgery, or in the home if a patient is housebound.

Temporary Residents

The doctors are happy to see any of your family and friends who need a doctor when they are staying with you. Similarly, when you are away from home in the UK you can visit any local doctor.

Please note there may be a charge for some overseas visitors.

Clinics

The following clinics are held at the surgery. The days shown may change due to holidays or training.

Antenatal Clinic

Patients are seen by the community midwives by appointment, at Ely Children's Centre. Please telephone **01353 611594** to book an appointment.

Asthma Clinic/COPD Clinic

Trained respiratory nurses run these clinics which are strictly by appointment only.

Child Immunisation Clinic

These are held at the surgery. Appointment reminders are sent out by Child Health. Please ring **Ely 663434 and press option 1** to book the appointment when notified.

Child Welfare Clinics

Development checks are offered to all new babies at six to eight weeks. Invitations are sent to attend these clinics, which are held at St Mary's Surgery.

Diabetic Clinics

Strictly by appointment only. These are run by trained diabetic nurses.

Family Planning Clinic

A full family planning service is offered at the surgery on Tuesday late afternoons.

Consultations are with a female GP and include the fitting of coils and the insertion and removal of Nexplanon contraceptive implants. Patients may consult their own GP for the oral contraceptive pill, or morning after pill within normal surgery hours but not all GPs fit coils or Nexplanon. Our nurses can deal with pill and coil checks and give depo-provera injections as well as general contraceptive and sexual health advice. Our family planning nurse also fits and removes Nexplanon contraceptive implants.

Flu Vaccination Clinics

Flu vaccinations are given annually during the flu season to susceptible and eligible patients. Please contact the reception staff in September, or when you see our flu banner displayed outside the surgery, to book your appointment. We usually run specific flu clinics on Saturday mornings during the autumn.

With all nurse-led clinics, there is some flexibility to be seen during treatment room sessions. However, we do need to manage these carefully to ensure adequate supplies of the vaccination are available, so please speak with reception if you cannot manage an appointment during specified clinic times.

Minor Surgery

We hold a clinic on a Thursday afternoon for minor surgical procedures which are undertaken by GPs qualified to carry out this work. Any such requests must be arranged with a doctor.

Stop Smoking Service

The Stop Smoking Service (CAMQUIT) can offer information and advice, counselling and Nicotine Replacement Therapy on prescription for anyone wishing to give up smoking. Clinics are held at the surgery weekly. Please contact us on **Ely 663434 and press option 1** to arrange for an appointment, or for telephone advice ring **0800 018 4304**.

Clinical Research

St. Mary's Surgery is part of the Primary Care Research Network in the East of England and is accredited by the Royal College of General Practitioners for research. Various clinical trials are undertaken each year and patient volunteers are sought for these.

Access to Medical Records

In general, patients are entitled to information about their health from any practitioner who is treating them. Should you require access to your records, please ask at reception for details of the procedure to be followed. Further information regarding access to medical records is contained within the leaflet "Health and Social Care Information and the Data Protection Act 1998" which is available from the surgery.

Confidentiality

We have a legal responsibility to keep confidential all of the information held about you. The obligation that the NHS has, together with the rights that every individual enjoys, are set out in the Data Protection Act 1998. Information about you may, however, need to be shared with others involved in your care from time to time - for example, with a hospital consultant or a district nurse. The sharing of medical information is specifically covered by the Act. Further information regarding the Data Protection Act is available from reception.

Chaperones

Chaperones are available for both male and female patients in the event that you need to be examined. To request a chaperone, please either ask at the reception desk, or mention this to the GP or nurse at the time of your appointment.

Interpreters

We can arrange for an interpreter to speak by telephone to the doctor or nurse at your appointment. Please ask at reception. It would be helpful if you could give us as much notice as possible so that we can ensure the availability of an interpreter for the required language.

Complaints Procedure

Complaints about the services offered by St. Mary's Surgery are thankfully very rare, but are taken extremely seriously and are dealt with fairly and promptly.

Complaints, or compliments, should be addressed to the practice manager.

Freedom of Information - Publication Scheme

The Freedom of Information Act 2000 obliges the practice to produce a Publication Scheme. A Publication Scheme is a guide to the 'classes' of information the practice intends to routinely make available.

This scheme is available from reception.

Patient Participation Group (PPG)

We have a PPG and its aim is to create a communication link between the practice and its patients, providing a forum for constructive discussion in areas such as health promotion and education, improvement of services and other topics determined by the needs of the community. For more information please leave your name and email contact details at the surgery reception. We will keep you informed of future meetings.

Non-NHS Services

A wide range of services are provided at St. Mary's Surgery which are not covered by the National Health Service e.g. medical examinations for HGV and PSV licences, pre-employment and fitness to travel examinations, signing of passport application forms and completion of private medical certificates etc for our own patients.

These services are provided at the discretion of the doctors and a fee will be payable.

SMILE

St. Mary's Surgery immediate and long-term equipment fund is called SMILE. Occasionally donations are received which are deposited in this fund.

This enables the practice to purchase items of equipment which benefit our patients, e.g. nebulizers for respiratory conditions, glucometers for diabetic patients, sonic aids for antenatal patients, an ECG machine, a defibrillator and dermatoscopes.

If you would like to make a donation, please ask to speak to the Practice Manager.

Details of Primary Medical Services

Details of Primary Medical Services in the area can be obtained from NHS Cambridgeshire's Patient Advice and Liaison Service Team. Block 23, Ida Darwin,

Fulbourn, Cambridge, CB21 5EE

Telephone 0800 279 2535 or 01223 725588.

[Zero Tolerance](#)

We strongly support the NHS policy on zero tolerance. Anyone attending the surgery who abuses the GPs, staff or other patients be it verbally, physically or in any threatening manner whatsoever, will risk removal from the practice list. In extreme cases we may summon the police to remove offenders from the practice premises.

[Self Treatment of Common Illnesses](#)

[Back Pain](#)

Back pain causes 13 million lost working days in Britain each year. Usually too much or inappropriate lifting or gardening is the cause. Be sensible, take things easy, prevention is better than cure. Rest and painkillers will relieve most cases within a few days. Your doctor will not mind if you approach a qualified physiotherapist, chiropractor or osteopath directly.

[Burns and Scalds](#)

Apply large quantities of cold water to the burn as soon as possible and maintain this for several minutes. A loose dressing is suitable for unbroken or mildly blistered skin. Larger burns and burns in children should be seen by a nurse or doctor.

[Coughs, Colds and Sore Throats](#)

No magic cure has been found for these common ailments. Viruses cannot be treated with antibiotics. Aspirin or paracetamol, soothing drinks and other remedies help relieve the symptoms until they pass naturally in a few days or so.

[Diarrhoea and Vomiting](#)

Again normally caused by viruses. Even holiday diarrhoea can be treated with small amounts of clear fluids, not milk, taken frequently to rest the stomach and prevent dehydration. In children, mixtures of glucose and salts (Rehidrat/Dioralyte) can be used. If the patient appears very ill, or in babies who can become dehydrated more quickly, consult the surgery if symptoms persist.

[Earache](#)

Usually earache accompanies coughs and colds. Paracetamol will relieve the pain. If symptoms persist, and with children, consult the surgery.

[Head Lice](#)

Very common in children, head lice prefer clean hair and are not a sign of poor hygiene. Lotions are available from the chemist for all the family.

[Threadworms](#)

All children will get these at some stage. An itching bottom, especially at night, is the most common complaint. Threadworms resemble small pieces of white cotton. Your chemist can advise you about treatment, again for all of the family.

[Head Injuries/Concussion](#)

Most bumps on the head cause no damage. A slight headache can be helped with paracetamol. If the patient is knocked out for more than a few seconds, consult the surgery. We may advise that the patient is taken to hospital if a more serious injury is suspected even though the patient can at first appear well.

[Spots](#)

Most childhood spotty illnesses are minor and often cause little upset. Measles is more serious, but is rare now that all children are immunised. Your doctor will not mind you attending the surgery with a spotty child to confirm diagnosis. All of these illnesses are contagious before the spots appear.

Insect Bites/Stings

Antihistamine tablets from the chemist relieve itches as can calamine lotion. Antihistamine creams are not recommended.

Nosebleeds

Pinch the nose between thumb and forefinger gently for five to ten minutes below the nasal bone. Persistent bleeding or a clot of blood down the throat may need further medical intervention. If heavy bleeding continues for more than 20 minutes you should go to A & E.

Sprains

R.I.C.E. - Rest, ice, compression, elevation. A cold compress with ice (a bag of frozen peas) applied over the strain for 30 minutes reduces and prevents swelling. A crepe bandage can be used and elevation continued until all swelling subsides. Gradual resumption of movements and exercise over a few days is recommended.

Sunburn

Treat as other burns. Calamine lotion and paracetamol will help. Avoidance, especially in children is most important. High factor sunblock and hats etc are advisable in all but the mildest of exposure to the harmful effects of the sun.

Alternative Formats

This leaflet can also be made available in other languages and in large print. Please ask at Reception for more detail
